

Respiratory Therapy Program

Respiratory Therapists are allied health professionals who aid in the prevention, testing, and treatment of cardiopulmonary diseases, such as asthma, emphysema, and sleep disorders. Their patients range from premature infants with undeveloped lungs to elderly patients who have diseased lungs. They are employed in a variety of settings, including hospitals, home care agencies, long-term care facilities, and aeromedical transport. This is a four-semester program.

Medical Scribe Program

Medical Scribes are allied health professionals specifically educated to work in ambulatory settings performing data entry. Medical scribes accompany physicians/providers into the exam room and transcribe patient histories, physical exams, and patient encounters. Medical Scribe is a new allied health field based on data entry into electronic health records. This is a short 18 credit hour program and students can transition into the Medical Assisting and Medical Coding programs.

Occupational Therapy Assistant Program

Occupational Therapy Assistants (OTA) help people whose lives have been affected by physical or mental illness or injury, such as a car accident or a stroke. Clients who benefit from occupational therapy include infants and children, working-age adults, and older persons whose conditions affect their ability to engage in everyday activities or occupations. The OTA Program is accredited by the Accreditation Council of Occupational Therapy Education of the American Occupational Therapy Association. This is a four-semester program.

EMS (Emergency Medical Services) Program

ENMU-Roswell's EMS Program is an EMS Bureau approved training Program designed for students interested in a career in pre-hospital emergency medicine. The Paramedic Program is also accredited by the Committee on Accreditation of Allied Health Educational Programs for the Emergency Medical Service Professions. The program provides the student with the theoretical and practical preparation to qualify the successful graduate at four levels of service:

1. EMR - Emergency Medical Responder
2. EMT - Emergency Medical Technician
3. AEMT - Advanced Emergency Medical Technician
4. Paramedic

Upon successful completion of a level, the graduate is eligible to take the National Registry of EMT exams and apply for state licensure.

Regional Medical Simulation Center

Our facility consists of a control room and four simulation rooms with high-fidelity human patient simulators. The center is designed to accommodate a simulated hospital or emergency home setting to enhance student engagement and improve clinical decision making skills. Also housed within RMSC is our Z-Space center. This is a state-of-the-art virtual 3D training classroom that is used to heighten all of our health education programs through specialized software.

ALL Programs in the Health Education Unit require mandatory drug testing and background checks.

Pharmacy Technician Program

Pharmacy Technicians are employed in retail and hospital pharmacies and work under the direct supervision of Registered Pharmacists. They perform a wide range of skilled activities which include preparation, packaging, storing, and inventorying of pharmaceutical products. They also answer phones, wait on customers, take payments, and submit insurance. This is a two-semester program, which includes a clinical experience in a pharmacy. Upon completion, graduates are eligible to take a national pharmacy technician exam.

The American Heart Association

The American Heart Association (AHA) mission is to build healthier lives free of cardiovascular diseases and stroke. The AHA is the nation's oldest and largest voluntary health organization dedicated to saving people from heart disease and stroke and the trusted leader in emergency cardiovascular care that trains people around the world in how to save lives with CPR and First Aid training.

Nursing Assisting Program

Nursing Assistants are a part of the health care team whose purpose is to care for people who are ill or have impaired self-care capabilities. They may work in a hospital, nursing home, or home health care under the supervision of a professional nurse in carrying out patient care assignments. This is a one-semester (16 week) program.

Medical Assisting Program

Medical Assistants are employed in a wide variety of health care settings including medical offices, clinics, laboratories, hospitals, chiropractic offices, and podiatric offices.

Medical Assisting students are trained in both administrative and clinical skills. Administrative skills include answering telephones, appointment scheduling, computer skills, billing and collection techniques, insurance claims processing, and coding.

Clinical skills include taking a patient history, performing vital signs, administering injections, drawing blood for lab tests, performing waived laboratory tests, assisting the doctor with office surgery and/or procedures, sterilizing instruments, performing EKGs and spirometry. This is a one-year certificate program with an associate's degree option.

Phlebotomy Program

Phlebotomists are part of the allied health care team who have been trained to perform phlebotomy procedures (drawing blood) in hospitals, health care offices, medical laboratories, blood banks, and forensic agencies.

This is a two-semester program which includes a clinical experience in a lab during the second semester. Students learn different methods of drawing blood, as well as waived lab testing.

Medical Coding Specialist Program

Medical Coders are professionals skilled in classifying patient medical records. Coders transform verbal descriptions of diseases, supplies, and procedures into numerical designations. Coding accuracy is extremely important for reimbursement of insurance claims. Coders are employed in both doctor's offices and hospitals. This is a three-semester (1 year) program and upon completion, the graduate is eligible to sit for the CPC (Certified Professional Coder) Exam through the American Academy of Professional Coders.

Nursing Program

Nurses are in high demand nationwide and a career in nursing can be very rewarding. ENMU-Roswell's Associate of Science in Nursing program is nationally accredited by the Accreditation Commission for Education (ACEN) in Nursing and approved by the NM Board of Nursing.

Following completion of the first year requirements, including courses such as Biology and Anatomy and Physiology which may take one academic year or more to complete, students begin a two-year program of study leading to an Associate of Science degree in Nursing (ADN). Upon successful completion of the program, the graduate may sit for NCLEX and obtain licensure as a registered nurse (RN).
