Advisor Notes:

This worksheet is designed to help you successfully plan and track your progress toward your degree. It lists all of the current graduation requirements in the recommended sequence. For full course descriptions, please refer to the current catalog.

The Associates of Science degree in Biology provides the foundations needed for the completion of a Bachelor of Science degree in Biology at a four-year institution. Coursework is broad enough that students may specialize in premedical studies, ecology, biotechnology, wildlife biology or secondary education with a science teaching emphasis.

In order to increase chances of success in more advanced courses, it is strongly recommended that students complete the Core 4 in the first two semesters. Choices in the General Education Courses can be added to reach semester requirements. All Program Requirements should be taken after the General Education courses have been completed.

- All students must take the University Skills Placement Text prior to beginning this program.
- Student must have an ENMU Campus System cumulative GPA of 2.00 in order to meet graduation requirements.
- All lectures and corresponding labs must be taken simultaneously.
- Student should submit a Graduation Application before the close of the semester preceding the expected completion date.

Courses only offered once a year are identified at the end of the course title with the following designations: F = fall only; S = spring only. Course enrollment may determine whether or not a course will be offered.
