Program Overview

Nurses are in high demand nationwide and a career in nursing can be very rewarding. ENMU-Roswell's Associate of Science in Nursing program is accredited by the National League for Nursing Accrediting Commission. Following completion of the first year requirements (which may take one academic year or more to complete), students begin a two year (or a minimum of four semesters) program of study leading to an Associate of Science degree in Nursing (RN). Mandatory background checks are required for all students enrolled in the nursing core courses.

Program Courses

The first year of the program consists of selected academic courses (such as Biology and Anatomy and Physiology) in preparation for progression into the nursing core courses. Enrollment in the nursing core courses is limited. The Associate of Science degree in Nursing transfers into a Bachelor of Science in Nursing (BSN) Degree program at ENMU.

See the current catalog for the complete degree plan. Course availability varies each semester.

Associate of Science - 66-74 credit hours
